

ACCESSORIES CONNECTION

1- **Screw-down cover** of the conventional 9V alkaline battery, non-rechargeable, with a battery life of about 3 months for moderate use.

2- **Selective connections** for conduction rod wires (copper handles).

3- **ON/OFF switch** to turn the main unit on or off, with an operating LED, indicating its status.

4- **9V power supply**, the unit automatically cuts off power from the internal battery to save energy when plugged with the power supply.
